RE: AP Computer Science Principles Summer Work

May 27, 2020

To All **Accepted** Students,

Hello! First off, I hope your family and you are safe and are doing well during this time. I am so excited that you are going to be a part of an exciting, challenging, and fun course during the 2020/21 school year. For your summer assignment, I am attaching a folder that lists “Mock Explore Performance Task.” Before you begin the summer assignment, please review the collegeboard AP Computer Science Principles link. There you will find vital information about the course and what to expect.

<https://apstudent.collegeboard.org/apcourse/ap-computer-science-principles>

For your summer work/assignment, I want you to create an Explore Performance Task. Do the BEST that you can. Don’t “overthink” this task. Below are parts of the assignment that will help you complete your “Mock” Explore Performance Task. You can also search “AP Computer Science Principles Explore Performance Task” on YouTube. The Explore Performance Task is one of the two projects that you will turn in to college board, which will count towards your AP score, during this class. Think of this as a sneak peek and practice before the real thing.
