

Good Morning Algebra I Students!

I want to start off by saying how much I miss each of you! This is an unprecedented time in our country, and I think I speak for all of us at GHS when I say that I cannot wait for this to be over.

While our district is working on next steps, they have asked that, during this time of closure, we provide you have the opportunity to further your learning. This means that any work assigned during this time will not be counted for a grade and it is not required; however, it is highly encouraged that each of you keep working and pushing to learn more even when you're home!

Because of this, I have assigned several assignments on Khan Academy. If any of the you would like, you can visit the website <https://www.khanacademy.org/join/Y9BHG74H> on any device that has internet. If you already have a Khan Academy account, you'll be able to use your existing login. If not, you'll have to create one. Once, you've logged on, you'll need to email me so that I can assign work for you! If they skip this step, I will not be able to verify that you've done the work! In addition, this will help me differentiate for each student, so that you're not working on skills that you've already mastered.

I encourage each of you to take part in this opportunity! I don't know what's going to happen over the course of the next few weeks, and it would be beneficial for each of you if you brushed up a bit on your skills! If you have any trouble, feel free to email me and I'll get back to you ASAP! Again, I cannot wait to be back in the classroom with each of you.

Hopefully, I'll see you soon!
