AP Computer Science Principles

Summer Work

2025 – 2026

Part I

Complete at least 3 projects in the code club Further Scratch Pathway.

Scratch is a block based coding language and the Further Scratch Pathway by code club is a guided series of projects using the Scratch programming language.

First create an account on Scratch's website by clicking here

Then join my class by clicking here

Then go here to get started on the Further Scratch Pathway.

I highly encourage you to play around and go further and farther after completing the required projects.

Part II

Find an article here that interests you. 1000 words or less explain the technology in the article and its impact on society.

If you have any questions or need any help, please contact me at walzj@scsk12.org
