

Plants are living things. All living things have needs in order to survive. Plants need five things to survive. Every plant needs sunshine. *Sun* gives the plant energy to make food. A plant needs *water* to help it stay alive. The water also helps it make food. Plants need *soil* to grow in. They must also have *space* in order to grow. If plants are too crowded, they will not survive, so do not plant seeds too close together. The last thing plants need is *air*. These five things are important for every plant.

## DAY 1

What are the five things plants need to make food?

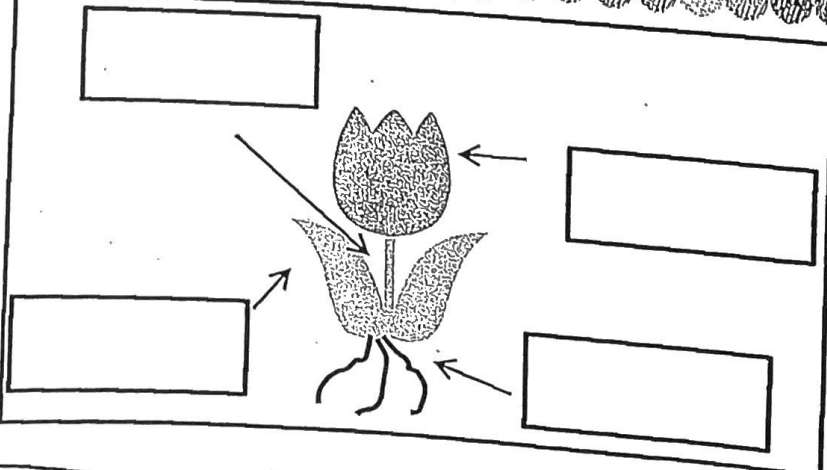

1. \_\_\_\_\_
2. \_\_\_\_\_
4. \_\_\_\_\_
3. \_\_\_\_\_
5. \_\_\_\_\_

## DAY 2

### Let's Label!

Use the words below to fill in the labels on the plant.

petals   stem   leaf   roots

# DAY 3

Main Idea	Detail	Detail	Detail

# DAY 4

Vocabulary Focus	What does <u>survive</u> mean?

# DAY 5

Text-to-Self Connection
What do <i>you</i> need to survive?
