Use students' Brigance Online Reports to complete the **Exit Conference Form** for the end-of-year conference with parents. The conference form will only include the "starred" skills (*shown above*) to provide a more simplistic view for parent discussions. (**Raw**, **Composite** (*measures age w/skill mastery*), **Percentile** (*average is 50<sup>th</sup>*), & **Age Equivalent** Scores (*compares to chronological age of child*)).

Please give parents input for the **Total Development Score** (*overall average for the entire assessment*), as well as, for the **Academic Cognitive** scores which focuses specifically on the child's (*literacy and math performance*). Remind parents that **assessments are a snapshot** and does **NOT** determine the child's total ability or potential. The form includes brief descriptors that help to interpret the meaning of scores.

There should also be a conversation that includes the child's **social emotional development** and how it plays an important role in his/her success in kindergarten and beyond.

Remember to **offer strategies and ideas** to help parents support and maintain the skills that children have mastered and/or need more time to develop.

Share the names of those required **documents for Kindergarten** registration to ensure parents are prepared and ready to transition into this new experience. (i.e. updated Physical exam/Immunizations, certified Birth Certificates, etc.). Remind parents that these documents do not automatically transfer with students leaving Pre-K. They must, personally, have these items (and others) in order to register.
