At-Home Assessment Agreement for Families

Greetings Parents, Guardians and Families,

This year we have all faced some unexpected challenges and having students take the i-Ready® Diagnostic at home is one of them. We thank for the support that you have provided with helping us acquire the academic information needed regarding your student, it helps us plan and provide instruction that meets their unique needs. As we prepare for the upcoming assessment's we're asking that you supervise your child's Diagnostic the same way a supportive teacher would. In doing so, we would appreciate your confirmation that you have understood and are able to provide the appropriate supports.

Specifically:

- I have viewed the video about how to support students while taking the Diagnostic at home.
- I understand that the i-Ready Diagnostic is a different type of test. My student will receive questions they will struggle with and are not expected to answer correctly.
- I will not help my student answer the questions on the Diagnostic, even if they struggle.
- I will have my student complete the assessment according to my teacher's directions (e.g. quiet place, free of distractions with needed technology, etc.), within the dates and/or times specified by the teacher.

We understand that it is difficult to watch your child struggle, even if that struggle is productive. However, we are asking for your trust that the best ways to help us meet your child's unique needs this year is to prepare them before the Diagnostic and allow them the opportunity to demonstrate their learning levels independently.

Thank you again for your cooperation as we work together to grow your child's learning in this unprecedented time.

Principal Tia James
