

OUR ACADEMY

At Kingsbury High School Academy of Information Technology, we engage students by using information technology as a lens through which everyday problems are analyzed, approached and solved. Students learn how to think as professionals and rediscover the wonder and joy of learning.

In August a new cohort of 30 students will be inaugurated in the information technology academy. NAF students will become a part of a national network with access to a multiplicity of exclusive opportunities, including scholarships and preferential hiring at prestigious multinational companies.

The benefits of being a NAF student include:

- Access to scholarship opportunities for undergraduate and graduate school
- Curriculum developed with the help of industry leaders
- Potential paid internship opportunities
- Opportunities to network with businesspeople
- Mentorship opportunities with successful NAF alumni
- Exclusive NAF networking and alumni events
- Preferential hiring at companies that recognize NAFTrack Certification

To be considered to become a member of the NAF cohort, complete an online application:

OUR MISSION

The faculty at Kingsbury High School is dedicated to student development. We work to release the intellectual capacity of all students while affirming their right to learn, focusing on a benchmark of a minimum of 90% Proficient on all state and federal summative assessments, with a minimum of 60% of students placing Advanced. We are committed to preparing our students to make a 30 or above on the ACT.

OUR VISION

By empowering our students to learn, Kingsbury High School hopes to instill in all students the ability to achieve their dreams, to work responsibly and ethically, to respect individual and cultural differences, and to adapt through continued learning, to the many occupational and technological challenges of the 21st century.

CURRICULUM*

The Kingsbury High School Academy of Information Technology provides students with exposure to various information technology occupations and focuses on the Networking and Coding programs of study.

The **Coding Program** is designed for students interested in computer programming. Students will develop standard programming techniques and learn the logic tools and methods typically used by programmers to create simple computer applications.

The **Networking Program** is study is designed for students interested in occupations including: computer support specialists, network and computer systems administrators, computer hardware engineers, and computer network architects. Students will acquire knowledge in both theory and practical applications.

Completion of the program prepares students for industry certification and further study at a technology college or even more advanced coursework at a two-year or four-year postsecondary institution.
